

Chemistry Tips

1. Complete all homework.
2. Read textbook EVERY day.
3. Answer questions and problems in book that are not assigned in class.
4. Do workbook worksheets that are not assigned
5. Review worksheets and problems at home after they are stamped and fix incorrect answers.
6. Do all assignments on time with lots of effort (don't copy just to get the points).
7. Read questions, figures, sample problems, headings, etc. before reading text.
Then go back and read text again.
8. Come in for extra help.
9. Form a study group.
10. Read each chapter 2 or 3 times
11. Take chapter notes even when they aren't assigned.
12. Take notes in class; don't just copy off the overhead projector.
13. Refer back to your notes each night while you're reading the text.
14. _____
15. _____
16. _____
