

Name _____

Problem-Solving Application Multiple-Step Problems

R 11-11

Write a number sentence for each part of the problem.

Think: Do you need to add, subtract, or multiply?

Use counters if you wish.

1. 13 children from Ms. Romero's class and 10 children from Mr. Tang's class went to the zoo. How many children went in all?

$$\underline{13 + 10 = 23} \text{ children}$$

The school bus holds 30 children. How many seats were empty?

$$\underline{30 - 23 = 7} \text{ seats}$$

-
2. Megan bought milk for \$1.50 and chips for \$1.25. How much did she spend?

She gave the clerk \$3.00. How much change did she get?

2 other children bought milk too. How much did they pay in all?

-
3. 3 groups of 5 children went to the lion house. How many children went in all?

1 group left before the others. How many children were left?
