

Name _____

Problem-Solving Application

R 2-14

Getting Data from a Table

Bottles Collected

Team	Green	Red	Blue
Number of bottles	38	27	13

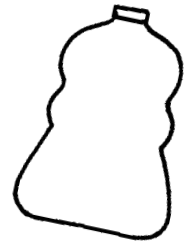

Use the table to solve each problem.

Do you need to add or subtract? Show your work.

1. How many bottles did the green team and the blue team collect?

$$\begin{array}{r} 38 \\ + 13 \\ \hline 51 \end{array}$$

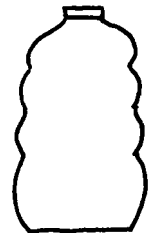

51 bottles

2. How many bottles did the red team and the blue team collect?

$$\begin{array}{r} \square \\ \square \\ \hline \square \end{array}$$

□ bottles

3. How many more bottles did the green team collect than the red team?

$$\begin{array}{r} \square \\ \square \\ \hline \square \end{array}$$

□ bottles
